

ENGINEERING TECHNICIANS & SUMMER INTERNSHIPS

CE&MT is an aggressive geotechnical/construction materials engineering firm with offices located in Gillette, WY and Farr West, UT. We are currently seeking engineering technicians to fill roles in both offices. We are looking for both full time technicians as well as individuals interested in a summer internship.

The engineering technician is responsible for providing quality control services on large construction projects. Quality control is accomplished through field and laboratory testing of materials such as soil, concrete, asphalt, masonry, and steel. Technicians must be able to work outside and effectively supervise their own project tasks.

The position offers health insurance including dental and vision, 401K, paid holidays and vacation, vehicle lease, mileage reimbursement, cell phone lease, and a generous monthly bonus program. Starting wages for full-time and internship positions range from \$13.00 to \$21.00 per hour depending on experience.

If you are interested in long-term employment with a company that values each and every employee and will give you the opportunity to take your career as far as you wish to go, then please contact us.
