

Burleigh County, ND Barricade Trailer

Problem Statement:

Locating, storing, loading and erecting barricades was always a problem. Many old barricades were shop fabricated and bases were not interchangeable. No employee wanted "barricade duty."

Solution:

A barricade trailer was designed to permit storage and easy loading and unloading of barricades. The trailer loads on and off the rear which permits shielding by a shadow vehicle. Cost for two trailers and 20 Type III barricades was approximately \$5,300.
